

Student 1 - Introduction, Problem & Overview

Time: 2 minutes 30 seconds

Slides: Cover + Slide 01 (The Problem) + Slide 02 (Application Overview)

"Good morning. Our project is called LAFSys - a Campus Lost and Found Board."

| Point at the cover slide showing LAFSys title.

"It is a Java console application for posting, searching, and claiming items."

| Point at the tagline on the cover slide.

"Now let me explain why we built this."

| Click to slide 01 - The Problem.

"Every day on campus, items are lost - and most are never returned."

| Point at the pull quote on slide 01.

"This happens in hostels, libraries, labs, and cafeterias."

| Point at the locations line.

"There are five practical reasons this project exists."

| Point at the five problems section.

"First - no central place to record a lost item or report one that was found."

| Point at problem 01.

"Second - notice boards are static and scattered across many buildings."

| Point at problem 02.

"Third - there is no way to search past reports."

| Point at problem 03.

"Fourth - manual matching between finders and owners is slow and unreliable."

| Point at problem 04.

"Fifth - there is no record of resolution, so the same item gets asked about again and again."

| Point at problem 05.

"Now let me show you how our system works."

| Click to slide 02 - Application Overview.

"There are four steps. Step one - Post. Enter name, category, date, location, and contact."

| Point at step 1 on slide 02.

"Step two - Save. The record is appended to items.txt on disk."

| Point at step 2. Emphasize the word appended.

"Step three - Search. Anyone can browse or search the list anytime."

| Point at step 3.

"Step four - Claim. The owner marks the item as resolved."

| Point at step 4.

"The five major features are - Post lost or found, View all records, Search by keyword, Claim items, and Persist to items.txt."

| Point at the five feature cards one by one.

"I will now hand over to explain the Java concepts we used."

| Gesture towards next presenter.
