

Student 4 - Live Demo, Testing & Conclusion

Time: 2 minutes 30 seconds

Slides: Slide 07 (Live Demonstration) + Slide 08 (Conclusion)

"Now I will demonstrate the application live and show the test results."

Click to slide 07 - Live Demonstration.

"The demo shows six things - main menu with live counters, posting a lost item, viewing lost items, searching items, claiming an item, and the end-to-end flow."

Point at the six caption frames on slide 07.

"Let me run the application now."

Open terminal. Type: `java -cp bin Main`. Press Enter.

"This is the main menu with live counters showing Lost, Found, and Resolved counts."

Point at the menu output in terminal.

"Let me post a lost item. I choose option 1."

Type 1 in terminal. Press Enter.

"I enter the item name, category, date, location, and contact number."

Fill in all fields. Press Enter after each.

"The item is saved with an ID number."

Point at the confirmation message showing the ID.

"Let me view lost items. I choose option 3."

Type 3 in terminal. Press Enter. Point at the table output.

"Now let me search for it. I choose option 5, then keyword search."

Type 5, then 1, then the keyword. Point at search results.

"Let me claim the item. I choose option 6, enter the ID, and confirm."

| Type 6, enter ID, type y. Point at the Done message.

"The demo shows the full flow - Post, Save, Search by keyword, view result, Claim, mark resolved, and update items.txt."

| Point at the arrow chain on the right side of slide 07.

"Now let me show the test results."

| Exit the app. Type: `java -cp bin Tests`. Press Enter.

"All 23 tests passed with 0 failures."

| Point at the test output showing passed and failed counts.

"Now for the conclusion."

| Click to slide 08 - Conclusion.

"We learned six things from building LAFSys."

| Point at the six learning cards.

"First - Separation of concerns. Model, service, storage, UI - each class has one role."

| Point at card 1.

"Second - Input validation. Reject bad data before it touches storage."

| Point at card 2.

"Third - Streams and lambdas. Concise and readable filter and search logic."

| Point at card 3.

"Fourth - Git collaboration. Branches, commits, and pull requests on one codebase."

| Point at card 4.

"Fifth - File I O with care. Files are always closed safely."

| Point at card 5.

"Sixth - Testing early. A test harness catches regressions before the demo."

| Point at card 6.

"Thank you. Questions and discussion are welcome."

Step back. Be ready for questions.
